Event Videography

- ***Benefits of videography***

As the old saying goes, “a picture is worth a thousand words.” Video is captured at 30 pictures per second! Skipno Productions will guarantee that your video includes every precious moment in your celebration, for “a video is worth a thousand stories.”

- ***Types of events covered***

Skipno specializes in weddings, anniversaries and cotillions/debuts. Please contact us for information regarding other special events you may have.

- ***Equipment & Technology***

The audio/visual industry changes its technology every day, and so do customer needs. Therefore, it’s important that our customers are provided with the most current technology available. Skipno Productions uses 3-chip DV camcorders, which can produce up to 530 horizontal lines of video resolution, compared to VHS, which can only produce about 240 lines. On-camera lighting is provided in low-light environments. Camera stabilizers and rolling tripods are also used to maintain smooth video coverage during the entire event. All footage is creatively edited using Apple’s award-winning video editing system, Final Cut Pro.

Skipno Exclusives

We are proud to present to you our unique family of video presentations, we call Skipno Exclusives. Usually presented in front of a live audience or reception venue, these videos have been designed to captivate audiences who crave non-stop entertainment, revealing your story in an unforgettable fashion.

- **Skipno Exclusive, “*How We Met*” love story video: \$1550 standalone, \$1300 package add-on**

This is certainly not your average “love story” or “slide show.” Recommended for weddings—this unique, documentary-style interview of the celebrant(s) takes you deep into the story of how they met, where they are now, and what the future holds for them. Preparation for this exciting show takes place months before the celebration event, and is presented on a big screen to family and friends during the reception. It will include up to 100 photos, 30 songs and up to 10 minutes of personal footage to be added in the interview. Presentation equipment (projector, screen, etc.) will be provided by Skipno Productions at no additional charge. In addition to a live presentation, “How We Met” will be provided on DVD. Optional distribution of video via internet available for \$100.

- **Skipno Exclusive, “*Déjà-Vu*” same-day edit: \$500 package add-on**

“Déjà-Vu” is more than just a video montage of events that occurred during your special day. It’s more than just a video that is shot, edited and presented live on the same day, just within a few hours. We know how crazy it gets for the bride and groom during their wedding day. To many, this 10 to 16-hour day will most likely pass as a total blur. With “Déjà-Vu,” you are now given the time to breathe and “re-experience” the earlier parts of your wedding day, just as it happened...in a fantastic 5-minute video montage presented live during your reception! In addition to a live presentation, “Déjà-Vu” will be provided via internet to share with friends and family.

- **Skipno Exclusive, “*Then to Now*” documentary-style video: \$1550 standalone, \$1300 package add-on**

Similar structure to *How We Met*, this documentary-style interview focuses on the celebrant(s) history from one point in time to another. Great for anniversaries, cotillions and debuts! Preparation for the show takes place months before the celebration event, and is presented on a big screen to family and friends during the reception. This will also include up to 100 photos, 30 songs and up to 10 minutes of personal footage to be added in the interview. Presentation equipment (projector, screen, etc.) will be provided by Skipno Productions at no additional charge. In addition to a live presentation, “Then to Now” can be provided on DVD for optional distribution to family and friends during the reception.

All Skipno Exclusives include the following services:

- 1 day of video coverage for interviews and other requests
- 1 camera with 1 operator on location
